In this issue

IN THIS ISSUE

Inform NT (cat. no 1308.7) is a quarterly newsletter produced by the Northern Territory (NT) Office of the ABS. It provides information about statistical developments, activities and products relating to the NT. Inform NT is designed to raise awareness of ABS products and services and to assist researchers, policy makers, service providers and others with an interest in the NT.

(b) Darwin.

(c) Weighted average of eight capital cities.

For further statistics about the NT see Regional Statistics, Northern Territory (cat. no. 1362.7).

NT GROWING NATURALLY

The preliminary Estimated Resident Population (ERP) of the NT at 31 March 2010 was 228,500, an increase of 1.9% (or 4,200 persons) compared to the previous year. The

major component of population growth in the NT for this period at 72% (or 3,000 persons) was due to natural increase (births minus deaths), net overseas migration accounted for 35% (1,500 persons), with the remaining due to a net loss of 7% (300 persons) from net interstate migration. Net overseas migration has declined for the third consecutive quarter, down 59% from 659 persons in June 2009 to 135 in March 2010.

Further information can be found in Australian Demographic Statistics, Mar 2010 (cat. no. 3101.0)

[Back to top](#)

INDIGENOUS WELLBEING ACROSS REMOTENESS AREAS

Despite recent improvements, Indigenous Australians remain significantly disadvantaged. In many cases, the disadvantage is greater outside the major cities, where most Indigenous people live. For example, 63% of young Indigenous adults in major cities were fully engaged in education or work compared with 41% in remote areas. See the full article in the latest issue of Australian Social Trends, Sep 2010 (cat. no. 4102), a quarterly released publication presenting analysis and commentary on a wide range of social issues. The September edition also includes the following articles:

- Parental Divorce or Death During Childhood
- Holidays Abroad
- New Zealanders in Australia
- Older People and the Labour Market
- Australian Workers: Education and Workplace Training.

NEW CAR SALES REMAIN STEADY

The September 2010 trend estimate for new motor vehicle sales in the NT has remained steady over the last four months at around 870, however it has increased by 11% when compared with September 2009. Looking at the types of vehicles sold, during the month of September 2010, passenger vehicles made up 44% of sales, sports utility vehicles contributed 24% with other vehicles making up the remaining 32%.

Further information can be found in Sales of New Motor Vehicles, Australia, Sep 2010 (cat. no. 9314.0)

NT CHILDREN MUSICALLY MINDED

According to the latest issue of Arts and Culture in Australia: A Statistical Overview, 2010 (cat. no. 4172.0), the participation rate for children aged 5 to 14 years in the NT who played a musical instrument in the 12 months to April 2009 was 24%, compared to almost 20% nationally. The Northern Territory was the only region to record a significant change (an increase) between 2000 and 2009. Providing a statistical overview of culture in Australia, this publication contains information on a range of topics including employment in culture, time spent on cultural activities, attendances at culture venues and events, expenditure on culture, and imports and exports of cultural goods and services.

MERCHANDISE IMPORTS RISE IN SEPTEMBER

Did you know that during September 2010 the NT imported \$390 million worth of merchandise (in original terms), an increase of 33% (\$97 million) compared to August 2010? This is the highest value of merchandise imports since March 2009.

Further information can be found in International Merchandise Imports, Australia, Sep 2010 (cat. no. 5439.0)

SURVIVAL OF THE BUSIEST

During 2008–09 the number of actively trading businesses in the NT fell by almost 1%, leaving around 13,900 operating at the end of the financial year. The number of new business registrations declined, the entry rate of almost 18% in 2007–08 fell to about 16% in 2008–09, and of the almost 2,500 entries in 2007–08 approximately 70% survived to June 2009.

Further information can be found in Counts of Australian Businesses, including Entries and Exits, Jun 2007 to Jun 2009 (cat. no. 8165.0)

IS LIFE IN AUSTRALIA GETTING BETTER?

The 2010 edition of Measures of Australia's Progress (cat. no. 1370.0) was released in September. This comprehensive electronic publication contains a range of information that can help Australians decide if life over the past decade has gotten better. Has the health of Australians improved? Have Australians increased their wealth? Has Australia reduced its greenhouse gas emissions? This publication presents reliable, easy to understand information that describes how Australia is progressing across a range of social, economic and environmental measures.

Measures of Australia's Progress 2010 uses traffic lights to summarise progress and regress across key measures and ensures that it's never been easier to get a clear picture of whether life in Australia is getting better.

The ABS is seeking input from Australians about what progress means to them. In a special feature article, Future Directions for Measuring Australia's Progress, the ABS has released an outline of how they might measure Australia's progress into the future. Join the conversation and share what progress in Australia means to you at the Measures of Australia's Progress Blog.

ANYONE FOR CHUCK STEAK, CHOPS AND LOW STRENGTH DRAUGHT?

During the September quarter 2010 Darwin had the cheapest price compared to other capital cities for the following items; beef chuck steak (1kg), lamb forequarter chops (1kg), whole fresh chicken (1kg), and low alcohol draught beer (285ml glass). However, for 28 of the 51 selected items, Darwin had the highest price including dairy products, bread, fresh fruit and vegetables, and full strength beer by the case.

Further information can be found in Average Retail Prices of Selected Items, Eight Capital Cities, Sep 2010 (cat. no. 6403.0.55.001)

BIRTHS AND FERTILITY IN THE NT DECLINE IN 2009

There were 3,800 births registered to women living in the Northern Territory in 2009, approximately 3% less than in 2008 (3,900). There were 1,500 births (40% of all births) where at least one parent identified themselves as being of Aboriginal and Torres Strait Islander origin on the birth registration form.

In 2009, the median age of Northern Territory women who gave birth was 28.3 years, while the median age of fathers (where age was known) was 31.5 years. These were both the youngest median ages recorded for all the states and territories.

As well as being younger, Northern Territory parents are less likely to be married at the time of the birth than in other states and territories. In 2009, the Northern Territory recorded the highest proportion of babies born into ex-nuptial relationships (63%). Of these ex-nuptial births, 27% were registered without acknowledgment from the father.

The Northern Territory's total fertility rate (TFR) in 2009 was 2.09 babies per woman, a decrease from 2.21 babies per woman in 2008. Over the past decade, the TFR for Northern Territory women has consistently been above the TFR for Australia. In 2009, the TFR for Aboriginal and Torres Strait Islander women in the Northern Territory decreased to 2.32 babies per woman, down from 2.42 babies per woman in 2008. However, as with most other states and territories, the TFR for Aboriginal and Torres Strait Islander women remained higher than the TFR for all women.

Fertility rates differ across the reproductive age groups. In the Northern Territory, women aged 30–34 years experienced the highest fertility rate of all age groups in 2009, with 106 babies per 1,000 women. Furthermore, the Northern Territory recorded the highest teenage fertility rate of all the states and territories, at 48 babies per 1,000 women aged 15–19 years.

Further information can be found in Births, Australia, 2009 (cat. no. 3301.0). Regional data will also be available from 9 December 2010.

[Back to top](#)

MORTALITY IN THE NT

There were 950 deaths of persons living in the Northern Territory in 2009 (590 males and 360 females), approximately 8% less than were registered in 2008 (1,000). Of these, there were 430 deaths of persons identified as being of Aboriginal or Torres Strait Islander origin on the death registration form.

In 2009, the Northern Territory had a standardised death rate (SDR) of 7.9 deaths per 1,000 standard population, the highest recorded of all the states and territories. The SDR for Australia was 5.7 deaths per 1,000 standard population.

The median age at death for the Northern Territory has increased over the past ten years. In 1999, the median age at death was 55.5 years for males and 61.7 years for females. In 2009, this has increased to 59.8 years for males and 65.2 for females. This is an increase of 4.3 years and 3.5 years respectively.

The infant mortality rate (IMR) in the Northern Territory was the highest in Australia, with 7.1 deaths per 1,000 live births in 2009. Australia recorded an IMR of 4.3 deaths per 1,000 live births in 2009.

Further information can be found in Deaths, Australia, 2009 (cat. no. 3302.0). Regional data will also be available from 9 December 2010.

Local Census Engagement Across Northern Australia

Census in Class

NT Government and ABS Census Coordination Team Working Together

Register of Interest for Area Supervisors and Collectors

'Census – Beyond the Count' Conference

Update to the Census Data Enhancement Project

LOCAL CENSUS ENGAGEMENT ACROSS NORTHERN AUSTRALIA

Michelle Milzewski, Census Local Engagement Manager for the Katherine area has recently been working on a joint recruitment campaign with Batchelor Institute of Indigenous Tertiary Education. Indigenous students from all corners of the country attend Batchelor Institute campuses in the Northern Territory. Recruitment for Census staff has proven to be quite challenging in the past, largely in rural and remote areas. The ABS together with Batchelor Institute will encourage Indigenous students to apply for Census positions in their local communities in 2011. Batchelor Institute is also exploring ways in which students can achieve academic outcomes from their Census 2011 experience.

CENSUS IN CLASS

As part of engagement with remote Indigenous communities, the Northern Australia Indigenous Engagement Managers (NA IEM's) have developed and tested a 'Census in Class' program aimed at educating the importance of Census to primary school children in upper primary (years 4 – 7). The purpose is to give the children an understanding of the Census, ensuring everyone is included on the Census form and that children are aware of the Census process and why the information is vital to planning for the future of their communities. Feedback from the schools where the 'Census in Class' was undertaken has been positive from both the teachers and the students. The activity involves students filling out the 'Census in Class' form and then as a group collating the information on a tally sheet and producing a story for the class including creating some graphs of the data.

NT GOVERNMENT AND ABS CENSUS COORDINATION TEAM WORKING TOGETHER

The NT Government and the ABS are working in partnership to support the 2011 Census. Larnie McClintock from NT Treasury and Rebecca Luxford the NT Government Liaison Officer for the ABS are collectively working on a Census recruitment project to raise awareness of upcoming employment opportunities for the 2011 Census amongst various NT Government agencies.

The recruitment project will be looking at placing suitable Census vacancies for NT Government staff, that will not impose with their current NT Government employment and responsibilities. For instance, Area Supervisor and Census Collector roles will most likely be promoted within the NT Government as these positions have the flexibility to be integrated into a daily routine or home life. In addition, other Census positions will also be available for people interested in working in remote Indigenous communities over a two to four week period as a Remote Area Mobile Team (RAMT) member.

With the Christmas and school holidays just around the corner it is envisaged Larnie and Rebecca will commence their Census recruitment presentations to the NT Government agencies early in the New Year.

REGISTER OF INTEREST FOR AREA SUPERVISORS AND COLLECTORS

Census has released a Register of Interest for Area Supervisor and Census Collector positions which can be accessed through the main ABS website. The register will allow applicants to record their interest in these roles and they will be contacted in early 2011 outlining further instructions on the application process for the vacancies.

Applications for Area Supervisors will open on 12 February 2011, and 9 April 2011 for Collectors. Information on how to apply for these positions will be widely advertised around these times, and is accessible on the recruitment pages of the ABS Website.

'CENSUS – BEYOND THE COUNT' CONFERENCE

In the lead up to the 2011 Census, the ABS will be hosting an exciting showcase event to promote the effective and innovative use of census data by government, community and private sector organisations. The 'Census | beyond the count' conference will be held in Melbourne from 2 – 4 March 2011. Speakers will be from a broad range of state, regional and local government bodies, charitable organisations and private institutions. If you or your

organisation take census data beyond the count, we would love to hear from you. Visit the [Census | beyond the count](#) website or email beyondthecount@abs.gov.au to find out more. You can also follow developments on twitter [@beyondthecount](#).

UPDATE TO THE CENSUS DATA ENHANCEMENT PROJECT

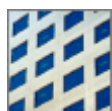

The Census Data Enhancement (CDE) project is a major project involving integrating unit record data from the Census of Population and Housing with other ABS and non-ABS datasets to create new datasets for statistical and research purposes. The project also adds value to data from the Census of Population and Housing by bringing it together with data from future Censuses.

Without compromising the privacy of individuals or the confidentiality of their data the CDE project delivers significant public benefits. The project facilitates:

- improved information to support good governmental policy making, program evaluation and service delivery; and
- an improved and expanded range of official statistics.

The project was first undertaken for the 2006 Census and the ABS intends to continue the project for the 2011 Census. Further information, including outcomes of the 2006 CDE project and plans for the continuation of the project for the 2011 Census can be found in [Census Data Enhancement Project: An Update, Oct 2010 \(cat. no. 2062.0\)](#).

NATSTATS 2010 – A SUCCESS

The NatStats 2010 Conference was held from 15–17 September 2010, at the Sydney Convention and Exhibition Centre, Darling Harbour.

The overall theme for NatStats 2010: "Measuring what counts: economic development, well-being and progress in 21st century Australia", explored drivers of economic and related social change that are shaping Australia's future development.

The conference was very successful and attracted over 460 delegates, 54 presenters and 14 exhibitors both representing users and providers of data from government, business, the media, and the academic and wider communities.

One of the key outcomes of the Conference is the development of a set of Conference Recommendations – broad, strategic objectives that will assist in setting directions for shaping a future statistical system that will be relevant and responsive to future challenges in Australia. The final Recommendations were formally released on 20 October 2010, to celebrate World Statistics Day. Please visit the NatStats website to view the Conference Recommendations, speaker presentations and photos.

WORLD STATISTICS DAY CELEBRATIONS AROUND AUSTRALIA

The inaugural World Statistics Day, initiated by the United Nations, was celebrated on 20 October 2010. Celebrations were held around the country, within the Australian Bureau of Statistics (ABS) and across the wider statistical community.

The ABS Central Office hosted a seminar with guest speaker Professor Glenn Withers from Universities Australia talking about the importance of statistics for policy making. To celebrate the day Brian Pink, the Australian Statistician released the following key publications:

- A Guide for Using Statistics for Evidence Based Policy
- The Recommendations of NatStats 2010 and the NatStats 2010 DVD
- The Community Trust in ABS Statistics Survey final results.

ABS Regional Offices celebrated World Statistics Day by holding seminars and presentations which demonstrated the statistical achievements in the different Australian regions. An important feature of this unique day was the recognition and celebration of the core values of the ABS – service to the Australian community and governments, professionalism and integrity, and the commitment to these values by all ABS staff in their daily work.

ABS Northern Territory Office celebrated World Statistics Day by holding a Population Census information session for external clients. Regional Director Tom Joseph spoke about the importance of the inaugural World Statistics Day and the release of the NatStats 2010 Conference Recommendations. Tarrant Moore of the Northern Territory Treasury also spoke about his experience at NatStats 2010.

World Statistics Day provided a great opportunity to share with stakeholders and to thank the general community for their trust in ABS statistics and their commitment to making Australia better by providing information on their lives, households, businesses and community issues.

For further information regarding World Statistics Day visit UNSD website

A GUIDE FOR USING STATISTICS FOR EVIDENCE BASED POLICY

Within Australian and international governments there is an increasing emphasis on the importance of using good statistical information when making policy decisions. In October, the publication, A Guide for Using Statistics for Evidence Based Policy, 2010 (cat. no. 1500.0) was released, providing an overview of how data can be used to make well

informed policy decisions. The publication includes the following information:

- How good statistics can enhance the decision making process
- Using statistics for making evidence based decisions
- Data awareness
- Understanding statistical concepts
- Analysing and evaluating statistical information
- Communicating statistical findings
- Evaluating policy outcomes.

ASSISTING TEACHERS WITH STATISTICAL LITERACY

The latest edition of Education News (cat. no. 1330.0), the newsletter from the Education Services Unit was released in October. Education News helps teachers in both primary and secondary schools use ABS resources in their classrooms. This issue features articles that assist Maths teachers utilise CensusAtSchool to improve their students' statistical literacy, introduces the International Statistical Literacy Project poster competition and encourages teachers to visit the 'Interact with ABS Data' pages.

ABS TRAINING COURSES

The ABS offers a variety of training courses for people who wish to develop their statistical skills. ABS training courses aim to equip participants with a range of statistical tools and techniques with which to analyse data, understand principles and methodologies of statistical collections, and provide practical skills in statistical analysis to help make quality informed decisions.

Details of all training courses can be found on the ABS Training webpage on the ABS website. If you have any queries or wish to register your interest in attending any of the courses on offer, please call 08 8943 2100 or email nt.statistics@abs.gov.au.

CALL FOR CONTRIBUTIONS AND FEEDBACK

Inform NT is a quarterly newsletter produced by the ABS NT Office designed to promote

statistical developments relevant to the NT. If there is something you would like to see included in future issues or if you know of something that would be of interest to Inform NT readers, please let us know.

Likewise, we would like to hear from you if you have any feedback on the content of the newsletter or suggestions for how it may be improved.

Contributions and feedback can be directed to the Client and Statistical Services Branch of the ABS NT Office, phone 08 8943 2105 or email nt.statistics@abs.gov.au.

About this Release

Inform NT is a newsletter produced by the Northern Territory office of the ABS. It provides information about new developments, publications, seminars, training and reviews.
